

## Instruction to Measure Current

### Connection steps

1. Set the power supply to 5.0 V.
2. Connect power supply + (red output) to multimeter **A SOURCE HI**.
3. Connect multimeter **A SOURCE LO** to MoleNet +Vin. (j7)
4. Connect power supply - (black output) directly to MoleNet GND. (j7)
5. Run the deep sleep test code. Wait until deep sleep, then read the stable current.

**Important: The multimeter must be in series. Do not connect it directly across + and GND**
